

Auckland Literacy Association

Presents

Digital Literacy and Integrating Information Technology across the curriculum and AGM

SAVE THE DATE

Speaker: Stuart Hale – Think Digital Coach

Stuart provides professional expertise to enable teachers and students to use 21st century technology successfully.

There is a 'Digital Class Ceiling' holding back the potential that modern devices can deliver for students. This workshop will seek to break through this glass ceiling and show what the true potential of a modern 21st Century device can be.

In the last 20 years schools have taken on technology that is incrementally advancing. In this workshop the iPad will be examined to see how it is transforming teaching and learning in New Zealand. No matter what the mode of literacy - Voice, Acting, Video, Animation the student can communicate in their "Voice" of choice. Not just reading and writing which has been well served for many years.

Where: Owen Gilmore Theatre, University of Auckland
Epsom Campus, N Block

Parking: Venue Location & Parking <http://bit.ly/2RYw06O>
